

MANAGEMENT REPORT

Date: March 14, 2017

Author: Amanda Pitre-Hayes, Director, Planning & Projects

Phone No.: 604-331-4006

VanDocs#: DOC/2017/072441

Meeting Date: March 22, 2017

TO: Library Board

FROM: Amanda Pitre-Hayes

SUBJECT: VPL 2020 Strategic Plan Quarterly Report Template

SUMMARY

The launch of Vancouver Public Library's new strategic plan, VPL 2020, provides an opportunity to refresh the way in which quarterly progress toward achieving the strategy is reported to VPL Trustees. A scan of best practices was conducted and results were presented to Trustees in January. Based on feedback received, the attached draft VPL 2020 Strategic Plan Quarterly Board Report Template was developed and is being brought forward for approval.

PURPOSE

This report is for decision.

RECOMMENDATION

That the Board approve the revised Strategic Plan Quarterly Report template.

POLICY

The revised report template will be used to report to the VPL Board quarterly on progress toward implementing Vancouver Public Library's new strategic plan: VPL 2020.

DOC/2017/072441 Page 1 of 3

STRATEGIC IMPLICATIONS

The revised report template is designed to ensure that Trustees receive timely and relevant data with which they can monitor Vancouver Public Library's progress toward achieving its strategic plan.

COMMITTEE DISCUSSION

The Committee discussed the proposed template, noting their appreciation for staff's presentation of diverse types of information as well as the succinctness of the format. There were some suggestions around appearance, such as use of graphics, ensuring that colours have other associated codes in the event that a reader has colour blindness, an acronym guide, the VPL logo, and that the Chief Librarian's comments include some formatting to enable reading. These changes have been incorporated into the attached, with the exception of the acronym guide; this will be added and updated quarterly as required. The Committee recommended that the template be approved with suggested changes noted.

CHIEF LIBRARIAN'S COMMENTS

The Chief Librarian recommends that the revised Strategic Plan Quarterly Report Template be approved as presented.

BACKGROUND

Vancouver Public Library's new strategic plan, VPL 2020, launched at Vancouver City Council in February, 2017. As implementation begins, there is an opportunity to refresh the way in which quarterly progress toward achieving the strategy is reported to VPL Trustees.

In January, VPL staff conducted a scan of best practices with respect to strategic plan board reporting in government and near-government organizations. The best practices (which are attached in Appendix A) were presented to VPL Trustees for discussion.

Trustee feedback (which is presented in Appendix B) was used to inform the draft VPL 2020 Strategic Plan Quarterly Report Template (attached in Appendix C).

DISCUSSION

The new draft VPL 2020 Strategic Plan Quarterly Report Template is organized by Strategic Plan Outcome. The reporting on each outcome is organized into three sections:

1. Indicators

Key Performance Indicator (KPI) data is presented. Where quarterly data is not available for a KPI, data for Supporting Indicators (a.k.a. proxy indicators) is presented. Key trends

DOC/2017/072441 Page 2 of 3

are illustrated through charts and relevant analysis is presented. The final Supporting Indicators are still being confirmed and may be altered from as presented in this report.

2. Initiatives

Top line status for all strategic plan operating initiatives is presented.

3. Impact

Stories illustrating outcomes achieved in support of the strategic plan are presented.

The proposed format responds directly to Trustee feedback on the strategic plan board reporting best practice scan.

FINAL REMARKS

The refreshed Strategic Plan Quarterly Report Template is designed to provide Trustees with relevant, timely, data with which to monitor the progress toward implementing the VPL 2020 Strategic Plan. Upon Board approval of the new report template, VPL staff will develop the data collection processes required to support the new reporting elements. VPL will deploy the new report template starting in Q2, 2017.

DOC/2017/072441 Page 3 of 3

VPL 2020 STRATEGIC REPORTING BEST PRACTICE EXAMPLES FOR DISCUSSION

1/25/17

OPPORTUNITY

- The completion of Vancouver Public Library's 2020 Strategic Plan (VPL 2020) provides an opportunity to reassess how the organization is reporting out on progress toward the achievement of strategic outcomes and goals.
- While the reporting from the previous strategy thoroughly detailed progress toward the completion of strategic initiatives (i.e. quarterly project status), and presented activity data (through quarterly metrics reports and activity reports), it was difficult for Trustees to answer key questions: Are we achieving the Strategic Goals we set out for the organization? In what strategic areas is our performance strong? In which is more attention needed?
- The introduction of Key Performance Indicators (KPIs) in the VPL 2020 Strategic Plan presents a related opportunity and challenge. Because some of the VPL 2020 KPIs can be measured and reported out on only annually, how will Trustees receive more timely quantitative information regarding the organization's progress related to these KPIs? There is an opportunity to include quantitative results on supporting indicators quarterly to ensure Trustees are able to provide appropriate oversight of the organization's progress toward achieving the goals and objectives in the strategy.

OBJECTIVE

- The objective of this best practice scan is to illustrate examples of ways in which other government and near-government organizations report out on progress toward the achievement of their strategic outcomes and goals.
- These examples are presented with the intention of sparking a discussion among key stakeholders about how VPL might evolve its non-financial reporting to provide Trustees with the information necessary to support effective oversight of the implementation of the VPL 2020 Strategic Plan

QUESTIONS FOR CONSIDERATION

- 1. What do you like about the following examples?
- 2. Are there particular elements within the examples that you find particularly strong?
- 3. Are there particular elements within the examples that you find superfluous or unnecessary?

NEXT STEPS

Based on outcomes of this discussion with Trustees and similar conversations with VPL
Management, draft templates will be developed to illustrate a potential new reporting
framework and related reports. These will be presented to Trustees for feedback at the VPL
Board's February meeting.

EXAMPLE A: CITY OF VANCOUVER

Downtown Eastside Plan Implementation Quarterly update to CMT – January 2017

DTES VISION

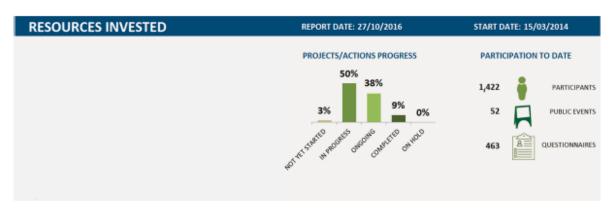

"...a neighbourhood of communities providing sustainable, safe and healthy places for everyone to live and work. These communities will continue to value and cherish unique characteristics, including diversity, economic mix, culture and heritage. The neighbourhood will be made up of mixed-income communities with a range of affordable housing options (including social housing) for all residents, local serving commerce, social services and cultural activities where all feel welcome, valued and at home."

PLAN PRIORITIES

DASHBOARD (Updated Quarterly)

The dashboard provides a snapshot of the plan's implementation. It tracks the City's investments into the area, progress of implementation actions, and progress in achieving 30 year targets. Since the dashboard is designed to be updated quarterly, four of the total fourteen 30-year targets are selected for the dashboard. The remaining of the targets will be updated annually (see overpage for Three Year Summary).

Page 1

THREE YEAR SUMMARY

Improved Well-being for All

 Planning work underway for a new childcare project at Gastown parkade. Construction is expected to begin in late 2017.

Healthy Homes for All

- Progress made in meeting secured market rental and new social housing units targets.
- \$1.26 million in Council-approved SRA grants to upgrade 251 SRA-designated rooms across 4 buildings.
- Funding to First United (\$40,000) and 390 Main St. (\$2,000/year x 5 years) for tenant advocacy.
- SRA Bylaw amended to increase amount Council can require for a conversion or demolition permit from \$15,000 to \$125,000 per room.
- Update and reset of Housing and Homelessness Strategy 2012-2021 through launch of Housing Reset process. SRO Task Force re-established to engage stakeholders (SRO owners, advocates, tenants, workers, and non-profits) to build on the DTES Plan objectives and inform Housing Reset process and recommendations.

Vibrant and Inclusive Local Economy

- Work started on the CED Strategy. The strategy, which is co-created with the community, was presented to Council in November 2016.
- A new commercial leasing non-profit (a "lease trust") has been formed with BC
 Housing, the City and VanCity Community Foundation as the principal directors. 57
 commercial units will be acquired by the non-profit. City might participate by adding
 City-owned commercial units to the portfolio.
- DTES Street Market relocated to 501 Powell, operating Saturday and Sunday.

Improved Transportation

- Completed multiple upgrades for crossings, curb ramps, bike lanes, crosswalk, surface treatment and lighting to improve safety.
- Transportation planning for Water Street underway.

EXAMPLE B: FRASER HEALTH

Introduction

Information presented in this report is driven by the 10 priorities identified in the Plan for Fraser Health (June 2014) and organized to be consistent with Our Health Care Report Card (November 2014 edition). For each of the performance measures, this report identifies the performance level relative to the target performance level and then highlights progress in recent initiatives, along with initiatives that are expected during the next quarter. Additional measures are included in some sections as they were identified in the Review and are important to the overall improvement efforts.

The performance measures presented in this report are based on the most up-to-date information available. While Period 9 (December 4, 2014) fiscal measures have closed because of the holiday period, some measures could not be calculated in time for this report. Therefore, the latest analyzed measures at the time of report preparation are included.

Priorities

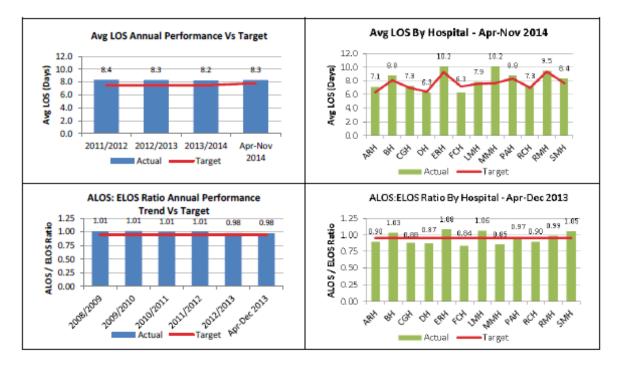

Improving Access to Care Across All Sectors

Capacity to support growth and aging of the Fraser Health population will be increased by developing efficiencies throughout the acute and community sectors and increasing investment in primary and community care¹. Optimized use of non-hospital resources will liberate resources to be used elsewhere and help ensure clients, patients and residents receive the right care, in the right place, at the right time.

It is important to note there is no one strategy to improve a specific measure of access to care; rather, multiple best practices, in combination, improve the patient journey and Fraser Health's indicator performance.

Primary care includes a variety of community-based clinics such as Diabetes, Respiratory, Cardiac, Aboriginal Health, and Mental Health and Substance Use, and may have the services of a nurse practitioner and/or family physician and members of an interdisciplinary team. Primary care also includes the 10 Divisions of Family Practice. Community care includes Home Health, End of Life, Mental Health and Substance Use (MHSU), Residential and Assisted Living, and Acquired Brain Injury care, clinics and services.

Average Length of Stay (ALOS) and ALOS compared to Expected Length of Stay (ALOS:ELOS)

Highlights

Average Length of Stay (ALOS) was 8.2 days this period, unchanged compared to the previous period. Year to date ALOS is 8.3 days, higher than the three-year target of 7.8 days. The numerator for ALOS has two components – acute days and ALC days. Continued focus on reducing both components is required. Many ALC patients have complex clinical, social and housing needs.

Every hospital has a customized ALOS target, reflecting the different range of services offered at each site. For example, some hospitals have surgical patients or maternity patients who have low ALOS and other hospitals have patients in rehabilitation who are expected to have longer hospital stays. Adjustments have been made to site-based targets to better reflect differences in the 'service mix' at the hospital level.

An ALOS that is higher than the expected length of stay (ELOS) may reflect delays in the timely transition of patients from the hospital to home or residential care. Simply stated, more discharges need to be done on a more timely basis. This measure informs quality improvements in both the acute and community settings.

Strategies initiated in the previous quarter to increase structure, accountability and focus on daily hospital operations are being maintained and enhanced. Site-based administrative and medical leaders are working with Hospital Operations Management Committees (HOMC) to monitor site performance against targets and to act on initiatives and process changes aimed at ensuring timely and appropriate discharges.

In order to increase the adoption of best practices, three high-priority clinical protocols (48/6, Catheter Associated Urinary Tract Infection (CAUTI) and Mobility) are being audited and actions are underway to ensure each protocol is fully implemented for all patients. All sites have shown an increase in compliance between the first and second audits, and strategies are underway to achieve full compliance by January. These protocols will improve quality of care while decreasing length of hospital stay.

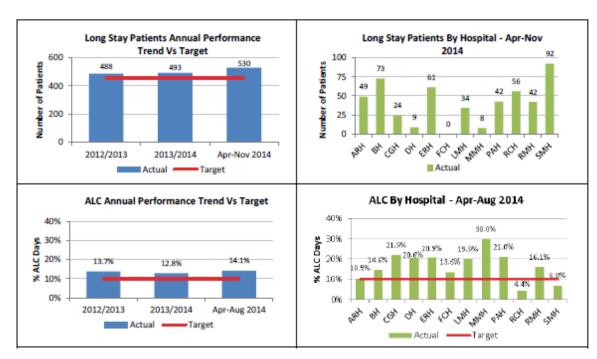

Progress has been made on physician-led initiatives to increase the use of an estimated date of discharge (EDD). Development of a toolkit to support care team application of an estimated date of discharge has been completed and is available for use. A phased roll-out and education plan for 12 hospitals is underway.

Next Quarter

Individual Hospital Operations and Management Committees (HOMC) action plans include: compliance with three priority clinical care protocols; initiatives to support the use of best practices in patient flow; and tools, education and audits to support the use of estimated date of discharge. Community investments described under the next measure will contribute to improved ALOS and ALOS: ELOS.

Service and process redesign initiatives in the primary and community sector are underway to decrease transition times between care and to transition patients to the appropriate service as quickly as possible.

Long Stay Patients Staying Over 30 Days and Alternate Level of Care (ALC) Patient Days in Acute Care Beds

EXAMPLE C: FULTON COUNTY GOVERNMENT

All People are Healthy

Priority Area Objectives, Measures & Progress

Creating a healthy community depends on three key factors the adoption of healthy behaviours by county residents, the availability and quality of the health care services that those residents receive, and the physical environment in which those individuals live, work and play. The County plays an important role in all three aspects. As part of our commitment to ensuring all people are healthy, Fulton County established a number of specific objectives and related key performance indicators as a way to measure our success over time. The progress indicators inform as to the change in performance since the last time measured and is not meant to represent overall performance of that measure.

OBJECTIVES	MEASURES	PROGRESS
	% of adult residents who smoke	
Residents prevent illness by	% of residents who have a BMI of 30 or less	
engaging in healthier behavior.	% of pregnant women who make prenatal care visits	
	% of residents 19-35 months of age who are adequately immunized	Coming Soon
	% of residents with Diabetes	_
The rates of disease and	% of residents with cardiovascular disease	
unhealthy medical conditions are reduced.	Rate of HIV Infection	
readeca.	Suicide rate	
	Ratio of primary care physician to # residents	
Residents have better access to	# of adult residents with access to health care coverage	
care	Average emergency room wait times	Coming Soon
	Average cost of Health Care	
	# of days with poor air quality	
Residents live in healthier	# of health based violations of drinking water	
environments	# of sanitary sewage spills	
	% of residents who have access to a park or bike trail	
	% of residents with access to healthy foods	
Residents have better access to healthy foods	% of residents living in a community with low density of fast food restaurants, convenience stores, and liquor stores	Coming Soon
incurring rooms	% of restaurants that pass health inspections	
	# of restaurant inspections completed on time	

Priority Area Strategic Initiatives

I. HB 885: Health Department

Description: Repealed a statute relating to the option for certain counties to create a county board of health and wellness by ordinance. Top administrative positions will now become State employees in as of July 2017.

Appendix B: Trustee Feedback or	n Best Practice Reporting Sc	an	

VPL 2020 Board Reporting Best Practices: Feedback from Trustees

1. General Guidance

- Three elements would be helpful, I believe:
 - An introduction, from the Chief Librarian that sets the context for the report (what was going on for the Library over the past quarter including consideration of events/issues outside the Library that may influence our ability to achieve the three year plan). No more than one page.
 - A detailed review that charts progress on goals & key actions/initiatives and shows how they are
 tracking (green/yellow/red, or arrows) this level should include summary commentary (key
 highlights and corrective actions) under each goal (not under each action, necessarily). Commentary
 is important (a look at the trees in the forest). This helps trustees understand the results and identify
 issues quickly.
 - Wrap it all together with a high level dashboard (organizational scorecard) that shows our progress on our 4 key outcomes with our KPIs - something like the City or Fraser Health examples (show the forest). One page.
- I would really love to do away with the Dashboard we get now. It is so hard to read/interpret, takes up so much space, etc. The wasted space in the monthly reports, ditto. I never read which goals a given activity meets. If that is helpful to the people who write up the reports, great; it is useless to me.

2. Strong Elements in the Best Practices Presented

CoV

- COV or Fulton County have examples of high level dashboards for the first level I note above. I prefer the COV one but the other works as well.
- I personally loved the City template. Loved the snapshot aspect of the COV one. The second example has a nice red/yellow/green stoplight concept but I still find the COV blows it out of the water. I am really attracted to a visually appealing and easily recognizable graphic not a list, not a chart.

Fraser Health

• I like the commentary built into the Fraser Health report. This will give Trustees insights on what the results are telling us.

Fulton County Government

- I really like this dashboard and would be great as a cover page for each of the four Strategic Plan areas.
- Fulton County Key performance measures and targets chart is quite intuitive and easy to read.
- I really like the brevity and visuals of the FULTON COUNTY GOVERNMENT example. It is easy to understand and to digest.
- I like the traffic light approach. Simple, easy to understand.

VPL 2020 Board Reporting Best Practices: Feedback from Trustees

- Re: Key Performance Measures Progress Section: This is very helpful.
- My feeling is that from the perspective of building a dashboard that is quickly understandable examples A
 [CoV] and C [Fulton County Government] are the strongest. Given the need to convey qualitative data as
 well as pure quantitative I would lean toward something very similar to example C [Fulton County
 Government].

3. Unhelpful Elements in the Best Practices Presented

CoV

- While the COV is helpful example at the high level it does not include enough commentary or details (my
 'trees' above) to allow a trustee to know where the challenges in the shorter term (quarter to quarter, for
 example). The commentary included is all achievements doesn't clearly show where there may be
 roadblocks or challenges.
- Re: COV Example: I appreciate the dashboard elements but also feel like if there is all of this per strategic goal it will end up being too much. The overarching dashboard pieces (like 'plan priorities') don't need to be repeated in each strategic goal section.

Fraser Health

- The mix of narrative and quantitative is good here but would have to be in a much more attractive format with key points that are important for us to know to stand out much more. I'm not sure where they want the focus in this format.
- Too much unnecessary dialogue.

Fulton County Government

• I like the idea of a top [level] timeline of some kind but monthly seems a little much. Perhaps more a status line? Like started-in-progress-complete with a marker showing where this item is at?

Calgary Public Library

- I do not find the Calgary Library reports useful at all it is difficult to see what the overall outcomes are mostly just a list of initiatives. Their strategic scorecard is somewhat helpful but too busy to see the overall trends and little in the way of commentary what are the results telling us?
- The third one [Calgary Public Library], great for policy wonks, visually so incredibly unappealing.
- I really want to like this and I think it could be great but it's visually difficult to interact with in this "paper" format.
- Example D [Calgary Public Library] is interesting but it suffers from information overload and is more suitable for an operational dashboard than a board dashboard.

VPL 2020 Strategic Plan Quarterly Progress Report

Q2, 2017

- DRAFT TEMPLATE -

Chief Librarian Remarks

6				
Su	0.01	0.0	le 1	ah.
	ши		L.J	-10

[An introduction from the Chief Librarian that sets the context for the report (what was going on for the Library over the past quarter including consideration of events/issues outside the Library that may influence our ability to achieve the three year plan).]

Learning, Creativity & Innovation: By 2020 VPL will be recognized as a go-to venue for learning, creativity, and innovation in Vancouver.

[Chief Librarian's remarks relevant to LCI]

Access & Equity: By 2020 VPL will be accessible and inviting to everyone

[Chief Librarian's remarks relevant to A&E]

Sharing & Collaboration: By 2020 VPL Will Be at the Centre of a Community That Shares Information, Ideas, & Stories

[Chief Librarian's remarks relevant to S&C]

Organizational Strength: By 2020 VPL Will Be Seen as a Vital Civic Service and Will be Adaptable in the Face of Change.

[Chief Librarian's remarks relevant to OS]

Learning, Creativity & Innovation: By 2020 VPL will be recognized as a go-to venue for learning, creativity, and innovation in Vancouver.

	2016	91%	_								

Key Trends

There is a steady, upward, trend in the number of cardholders active in the last 12 months. This can be attributed to three things. First, the opening of NCS, and related earned media, generated renewed and significant interest; both foot traffic and circulation numbers at this branch rose by 500% and 300% respectively compared with the same period in 2015. Second, the introduction of the Pet Lending collection at the beginning of 2016 saw a surge in activity system-wide. Third, the 'You Check it You Keep It' promotion, where patrons are allowed to keep materials they check out forever, has also been a main contributor. This trend is not expected to continue as the cancellation of the Pet Lending program, and the dwindling supply of materials in the stacks due to the current promotion prove to soon reverse the current trend.

The number of new cardholders is in steady decline due to the Pets Are Lovely (PAL) campaign entitled: 'What the hell VPL?' calling for an end to our new Pet Lending Program. PAL is appealing to the public to boycott VPL through full page newspaper advertisements and by circulating literature with pictures of sad puppies outside VPL branches. Management plans to discontinue the practice of Pet Lending immediately.

Part 3: Impact

Impact Story From Central: Balloons for Everyone Initiative

Studies show that playing with balloons in childhood is key to developing strong spatial skills and manual dexterity, yet one in four children in Vancouver do not have access to balloons. To address this gap, VPL Childrens Librarians at Central developed the Balloons for Everyone Initiative. Once a month, children are invited to come and play with balloons at the Children's Library at Central. Initially developed as a pilot, the program has been enhanced based on early learnings. For example, the use of clowns to distribute the balloons has been discontinued because, well, clowns are creepy. 450 children have benefitted from this program to date and there is a substantial wait-list. VPL is investigating ways to expand the number of sessions offered in the future.
